ABOUT THE EVENT

Cayman Islands Fund Administrators Association (CIFA) will be holding its two day course on Fund Administration in the Cayman Islands.

This program is designed to provide attendees with an overview of the fund industry in the Cayman Islands including regulatory, accounting, and legal aspects. It is directed at those individuals who are new to the industry and those interested in expanding their knowledge of this segment of the Cayman economy.

CIFA is fortunate to have a series of instructors drawn from the local market who bring with them many years of experience and knowledge.

It is the hope of CIFA to encourage both interest and education in the fund administration industry while supporting the local community through education.
